Open Gateway

GSMA-led initiative in the telco sector that seeks to transform the communications networks into platforms.

Open Gateway will open up **telco capabilities in an interoperable, intuitive and programmable way.**

These capabilities are deployed through **global and standardized APIs under the framework of CAMARA**, the Open-Source project led by the Linux Foundation in partnership with the **GSMA**

41 mobile operator groups

- +200 mobile networks
- 65% globally

The first advanced telco APIs

- API Carrier Billing
- API QoD Mobile
- API QoD WiFi
- API SIM Swap
- API Device Status
- API Device Location
- API Number Verification
- API Blockchain Public Address
- API Know Your Customer

Many more still to come!
