Disclaimer

This document contains statements that constitute forward looking statements in its general meaning and within the meaning of the Private Securities Litigation Reform Act of 1995. These statements appear in a number of places in this document and include statements regarding the intent, belief or current expectations of the customer base, estimates regarding future growth in the different business lines and the global business, market share, financial results and other aspects of the activity and situation relating to the Company. The forward-looking statements in this document can be identified, in some instances, by the use of words such as "expects", "anticipates", "intends", "believes", and similar language or the negative thereof or by forward-looking nature of discussions of strategy, plans or intentions.

Such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and other important factors that could cause actual developments or results to differ materially from those expressed in our forward looking statements.

Analysts and investors are cautioned not to place undue reliance on those forward looking statements which speak only as of the date of this presentation. Telefónica undertakes no obligation to release publicly the results of any revisions to these forward looking statements which may be made to reflect events and circumstances after the date of this presentation, including, without limitation, changes in Telefónica’s business or acquisition strategy or to reflect the occurrence of unanticipated events. Analysts and investors are encouraged to consult the Company’s Annual Report as well as periodic filings filed with the relevant Securities Markets Regulators, and in particular with the Spanish Market Regulator.

The financial information contained in this document has been prepared under International Financial Reporting Standards (IFRS). This financial information is unaudited and, therefore, is subject to potential future modifications. 2004 financial results were originally prepared under Spanish GAAP and have been translated into IFRS for comparison purposes only.
Imagenio becomes a key element of the Digital Home concept pursued by Telefónica to maintain its market leadership ...

Digital Home Vision:

“Telefonica will offer its customers a range of digital content and services delivered to any room in the house, on any device, to be enjoyed by the whole family whenever they want”

Customers will have access to a huge number of digital content and services that will enhance their lives through an integrated offer:

- Services
- Content
- Equipment
... being currently the best performer in the telco sector in terms of absolute IPTV customer growth

- As of today, Imagenio is available in all Spanish regions
- Increased coverage will be achieved following a profitability likelihood planning method

Case study: Priority Investment areas in the Madrid region

Data mining demand model, tuned by Imagenio customer base
Imagenio has become one of the main drivers of success for Telefónica in the Spanish broadband market.

Imagenio

+ Domestic Calls

Dúos y Tríos

ADSL Mini

+ Imagenio

+ Domestic Calls

Imagenio client base accelerated with 2-Play and 3-Play offers launched in Sept. 05 to reach 206,572 clients by end of 2005.

Imagenio

25.00 1 EUR/month

1. Decoder monthly fee rental not included (6.5 EUR/month)

ADSL Mini

46.00 2 EUR/month

1. 1Mbps with 1GB monthly data downloading limit
2. Decoder monthly fee rental not included (6.5 EUR/month)

Retail Internet BB Market Share 1

Telefónica is driving Internet Broadband penetration growth while maintaining market share.

1. Estimated for the Telefónica Group in Spain
In 2004, Telefonica decided to evolve its network architecture based on its prior experience.
There are multiple lessons to be learned with regards to the key design parameters of an IPTV solution

What almost everybody talks about:
- Broadband network: access (IPDSLAM), transport (GEThernet/ SDH), IP Core
- IPTV Platform: middleware/ DRM/ STB/ Look&Feel
- Video compression technology: MPEG2/ MPEG4/ WM9
- Systems: provisioning & billing
- Content

What almost nobody talks about:
- Home networking
- Knowledge of access
- Design & availability for video signal
- Knowledge of customer behaviour
- Network & services architecture
- O&M/ customer care systems & processes
Early issues and challenges range across the whole customer experience

<table>
<thead>
<tr>
<th>Area</th>
<th>Details</th>
</tr>
</thead>
</table>
| Customer acquisition      | - TV over ADSL constitutes a very powerful offer at a reasonable price  
- Adequate coverage and product awareness are key factors for a successful and effective commercialization  
- Customers barriers to purchase include:  
  - ... the product is perceived too new for some customers and they prefer to wait to see how it works  
  - ... telecom operator not perceived as a TV provider  
  - ... content offer fitted to diverse customer needs  
  - ... installation process perceived as a complex operation  
- Sales channels must be trained to handle a complex new product/ business                                                                 |
| Provisioning and installation | - Operational processes are critical due to the quantity of new details to be taken into account in order to ensure customer satisfaction:  
  - Incorrect coverage verification or product incompatibility  
  - Saturation in operations and infrastructure deployment due to the high growth in sales  
  - Customers canceling prior to installation  
  - Problems during the installation, multiple causes |
| Customer retention         | - Situations that must be avoided since day 1 include:  
  - Technical and malfunctioning service problems  
  - Insufficient value added perceived in the product (product/price relation)  
  - Difficult retention at the end of aggressive but needed try& buy promotions |
Telefónica has had a 4-year learning period, already having a business model not easily replicable by its main competitors.

- Telefónica’s success is not directly related to access technologies availability.
- Video on Demand (VoD) has proven to be the hardest technological milestone to be achieved.

Telefónica is now prepared to export its IPTV winning model abroad: CTC (Chile), TeleSP (Brazil) and Cesky Telecom (Czech Rep.) already in their market test phases.

Source: Telefónica and companies’ press releases.
Currently we do not see any limits to the growth and development of Imagenio

Main figures

- More than 200,000 customers connected at 2005 year end
- 34% of our customers buy “video club” VoD films (3 films by month in average)
- 21% of our customers buy football contents (2 matches by month in average)
- 20% of our customers have at least one subscription service
- Massive service with national coverage

Near future:

- More customers: 1 million by 2008
- More channels (beyond basic package), more flexible
- More complete/ attractive VoD content offering
- More interactivity, new and better services
- More coverage: 50% of households by 2008
