

Press release

## Alaian, in collaboration with Qualcomm Technologies, Inc., seeks Extended Reality startups

- Extended Reality startups selected by Alaian and Qualcomm Technologies, Inc. will be able to access exclusive benefits such as access to a network of 700 million customers in more than 50 markets offered by the telcos, as well as Snapdragon Spaces XR Developer Platform and development kits offered by Qualcomm Technologies.
- Alaian is a unique global alliance of eight of the world's leading telcos, including Telefónica, which seeks to be constantly innovating through different actions..

**Madrid, July 7<sup>th</sup>, 2023.** - [Alaian](#), the alliance of eight of the world's leading telcos (Bouygues Telecom, Cellnex, KPN, MTN, NOS, STC, Telefónica and Wind Tre), in collaboration with [Qualcomm Technologies, Inc.](#), one of the world's leading provider of processors for mobile devices, is launching a global call for innovative startups in the field of Extended Reality (XR).

In the current context, where Extended Reality - encompassing virtual reality, augmented reality and mixed reality - is transforming multiple industries and revolutionising the way people interact with the digital and physical world, Alaian and Qualcomm Technologies have decided to join synergies to identify startups with the most disruptive solutions. For this reason, they are looking for startups with use cases in metaverse, video games, edutainment, industry and manufacturing, logistics, retail, digital social experiences, connectivity, networking, devices, virtual platforms, as well as other applications or services. Also considered are connectivity tools and software to enhance the deployment of XR product and service use cases; XR mass entertainment in the home; and XR sustainability tools for large enterprises.

The startups selected by Alaian and Qualcomm Technologies will have access to the resources available of the telecoms, such as knowledge of the markets in which they are located, their network of contacts, connectivity and infrastructure, potential capital investment from any of Alaian's Members investment vehicles as well as exposure to our global network of VCs, training for entrepreneurs and access to business development initiatives by the telecoms.

Qualcomm Technologies will also offer them a number of exclusive benefits, including access to Snapdragon Spaces Developer Platform and development kits, which will enable startups to create and optimise next-generation extended reality experiences. In addition, dedicated engineering support will be provided to help companies overcome technical challenges and maximise the potential of their projects, as well as priority access to the Snapdragon Spaces Pathfinder program, which offers a network of resources and strategic opportunities to accelerate startup growth.

Daniel Hernández, VP Devices & Consumer IoT of Telefónica, said: "This joint call offers an exceptional opportunity for startups that want to accelerate their growth and benefit from the backing of eight major companies in the telecommunications sector. We are excited to discover new talent and promote the development of disruptive solutions in the field of Extended Reality."

Douglas Vaz Benitez, Senior Director, Business Development, Qualcomm Europe, Inc. said "We are delighted to be partnering with Alaian on this exciting new project. We have Extended Reality (XR) Research & Development centers in Europe and our main objective is to enable startups to succeed by creating immersive applications in a faster, easier, and more profitable way. XR will become a central part of the world we'll live in, in the coming years and Qualcomm's XR Solutions, with special emphasis on Snapdragon Spaces, are available to anyone who wants to be part of this new technology transition. We are very excited for the opportunities we have ahead of us!"

Companies interested in participating in this joint call can obtain more information and submit their projects through [Alaian's official website](#).

## **Alaian is a globally unique telco alliance**

[Alaian was launched in April 2022](#) as an alliance bringing together eight of the world's leading telcos with the ambition to reinvent the telecommunications sector. The members of Alaian are: Bouygues Telecom, Cellnex, KPN, MTN, NOS, STC, Telefónica and WINDTRE. With this alliance they seek to join forces to share best practices and different use cases on the latest technologies they are implementing, in their ambition to constantly innovate.

Another of its objectives is to discover the most disruptive and high-potential startups in the sectors, through global calls such as the current augmented reality call, to attract companies that are aligned with its strategic innovation priorities and thus give them access to a network of 700 million customers with a presence in more than 50 markets.

## About Qualcomm

Qualcomm is enabling a world where everyone and everything can be intelligently connected. Our one technology roadmap allows us to efficiently scale the technologies that launched the mobile revolution – including advanced connectivity, high-performance, low-power compute, on-device intelligence and more – to the next generation of connected smart devices across industries. Innovations from Qualcomm and our family of Snapdragon platforms will help enable cloud-edge convergence, transform industries, accelerate the digital economy, and revolutionize how we experience the world, for the greater good.

Qualcomm Incorporated includes our licensing business, QTL, and the vast majority of our patent portfolio. Qualcomm Technologies, Inc., a subsidiary of Qualcomm Incorporated, operates, along with its subsidiaries, substantially all of our engineering, research and development functions, and substantially all of our products and services businesses, including our QCT semiconductor business. Snapdragon and Qualcomm branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries. Qualcomm patented technologies are licensed by Qualcomm Incorporated.
